DEFENDING YOUR DATA
DATA PROTECTION FOR CIOS AND IT MANAGERS

One of the most important tasks in any business is ensuring the integrity and security of your data. It's a serious and bottom-line-critical responsibility, especially when you consider the legal and regulatory implications of personal data protection.

Most jurisdictions have laws requiring companies to keep customer data safe, secure and private.
The most comprehensive of such laws affecting businesses operating in Europe is the **EU General Data Protection Regulation (GDPR)** and is set to become law at the latest **May 25th, 2018**. Countries may adopt GDPR into law before this date, making compliance an urgent priority for businesses operating within them.

The consequences for non-compliance with these and other regulations can be disastrous. Article 83 of GDPR outlines the fines for companies that lose or mishandle customer data; in brief, these could amount to up to **€20m** or **4%** of total global turnover (whichever is higher) each year.

Clearly, data protection is a growing concern.

If you implement a strong data policy, heeding regulations and using the most advanced security technologies, you can save your company from potential revenue loss under the new EU regulations.

THE DATA READINESS ASSESSMENT

Follow up
Follow-up participant interviews to help clarify and expand on the insights gleaned from the online survey

Survey
An online survey in which participants will answer questions pertaining to the company's IT, providing valuable feedback to the CIO and entire IT staff

Analysis
Analysis of quantitative and qualitative results, using advanced statistical methods as well as normative interpretation

Kick-off
Kick-off meeting where participants will be coached on how to complete the survey

Report
Final report delivered with improvement recommendations

HOW DO NASHTECH AND THE IVI WORK TOGETHER?

To meet these ever-growing demands, NashTech has partnered with the IVI to answer this challenge; together, we provide our clients with a full suite of independent assessments, that highlight capability gaps, create comprehensive answers to those gaps and build remediation plans to support customers on a continual journey of improvement.

These assessments are powered by the IT-CMF, an IT Framework, and are designed to integrate seamlessly into existing engagement practices. Some of the assessments we deliver cover:

- Digital Readiness
- Data Protection
- Cloud Readiness
- IT Effectiveness

About IVI

www.ivi.ie

The IVI is a not-for profit, independent organisation co-founded in 2006 by Maynooth University and Intel to create a global standard for IT management – the IT-CMF. The IT Capability Maturity Framework (IT-CMF) is a framework specifically created to derive real, measurable business value from IT. It helps organisations devise more robust strategies, make better-informed decisions and perform more effectively, efficiently and consistently.

About NashTech

www.nashtechglobal.com

NashTech has been enabling innovative business and digital transformation through IT services spanning Advisory, Software, Business Processes and Infrastructure since 2000. From global office locations, NashTech supports organisations with both outsourcing and consultancy requirements delivering from its offshore centres in Vietnam.
